

SMARTDRIVE EXTENDED RECORDING

PROTECTING YOU AS A BCO BEYOND DRIVING

Video-based safety systems do a great job of telling you what happened when a high-impact event occurs, but they don't always capture everything. That's when SmartDrive® Extended Recording can help.

In addition to ensuring you never miss a driving incident, SmartDrive's Extended Recording ensures that BCOs gain additional pre and post insights to incidents and collisions. SmartDrive's newest state-of-the-art hardware architecture, SR4, now offers extended recording via a solid state drive to provide longer life and more storage for you as a BCO.

SmartDrive Extended Recording continuously records video providing valuable context—helping BCO's understand a variety of different situations not covered by the standard SmartDrive video platform, including:

- Thefts
- Workers' compensation claims
- Non-driving situations, including deliveries and use of specialized equipment
- Minor accidents such as side-swipes that may not otherwise trigger the camera
- Attacks on a driver or unruly passenger behavior
- Mirror strikes

SmartDrive Extended Recording, with unmatched video recording capability, helps you capture and store an uninterrupted and comprehensive picture of events that happen— whenever and wherever they occur.

MORE INSIGHT MORE PROTECTION

ACCURATE AND SUSTAINING VIEW OF WHAT ACTUALLY HAPPENS

- **Supports constant video coverage of vehicles and behaviors while on the road**

With up to 200 hours of recording, you get an actionable record of events while your vehicle is in operation.

- **Protects your well-being and actions after an incident**

Provides indisputable evidence of events surrounding—or in the vehicle; not-at-fault BCO drivers can be exonerated.

- **Shields your vehicle or fleet from theft or unscrupulous insurance fraud**

Security of an unattended vehicle is enhanced should the driver step away; quick assessment of what really happened on the road can help reduce insurance fraud and your liability.

EXTENDED RECORDING FEATURES

- **Up to 200 hours of continuous recording.**
- **Multiple camera video capture.** Extended Recording captures video from one to up to nine cameras, providing valuable insight into what is occurring in and around the vehicle.
- **Order Events.** BCOs can order Extended Recording Episodes for any time period desired within the 200-hour window, even up to a full day (24 hours) if desired.
- **Ignition off configurable.** Extended Recording can be configured after the vehicle's ignition is off, capturing incidents after the driving is complete.
